Acknowledgments

This project was funded in part by a grant from the Centers for Disease Control and Prevention, number U58/CCU022801 and administered via a cooperative agreement with the Idaho Bureau of Health Policy and Vital Statistics. The contents are solely the responsibility of the authors and do not necessarily represent the official views of the Centers for Disease Control and Prevention.

Special thanks go to Jeff Harder of Boise, Idaho, for his excellent artwork and his design of the cover.

The Idaho Department of Health and Welfare would like to thank the citizens of Idaho who have participated in the Behavioral Risk Factor Surveillance System.

For more details on this project or any of the survey results, please contact the Bureau of Health Policy and Vital Statistics at (208) 334-5977.

Idaho Public Health Districts

Idaho is divided into seven public health districts, with each of the districts containing four to eight counties. The seven health districts are independent agencies governed by a local board appointed by the county commissioners within the district.

2004 Estimated Population Adults Age 18 and Over

Overall:962,731

District 1:135,341

District 2:75,236

District 3:148,437

District 4:267,622

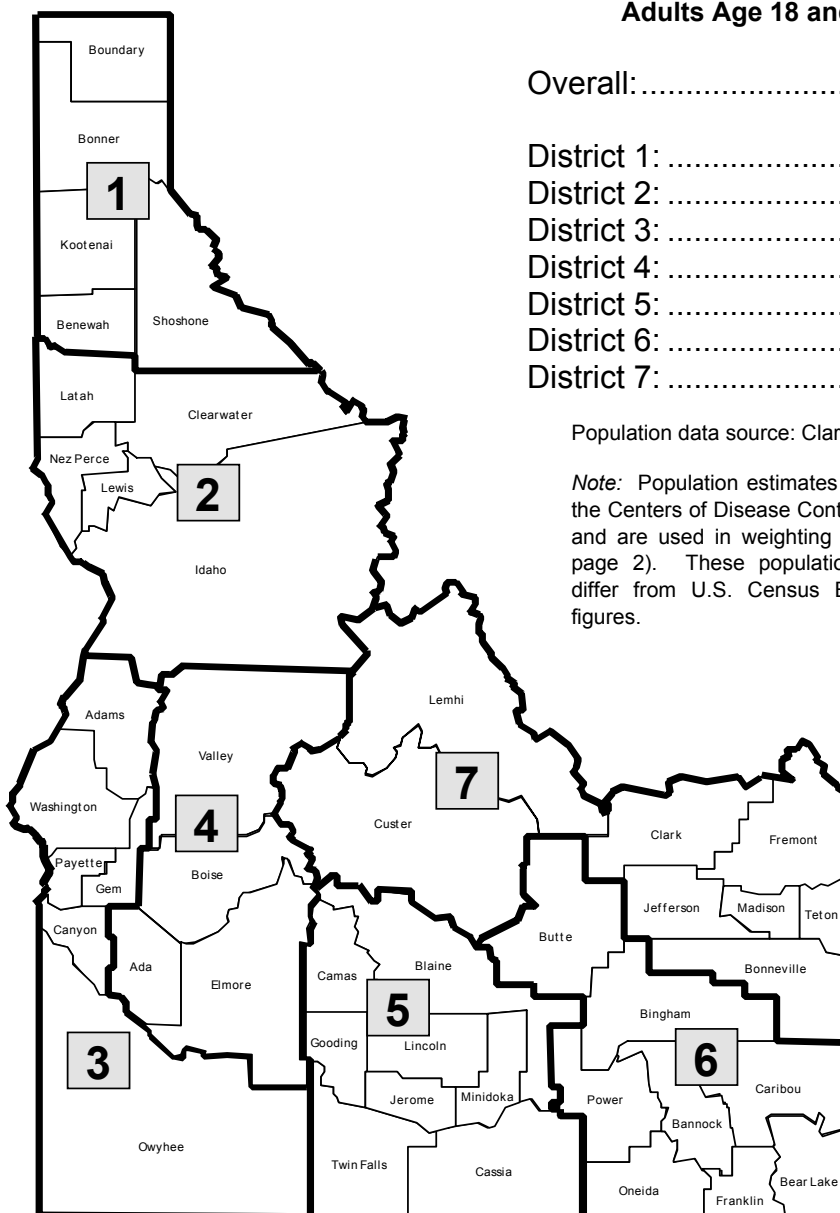

District 5:114,788

District 6:107,110

District 7:113,198

Population data source: Claritas, Inc.

Note: Population estimates are obtained from the Centers of Disease Control and Prevention and are used in weighting BRFSS data (see page 2). These population estimates may differ from U.S. Census Bureau population figures.

Idaho Behavioral Risk Factor Surveillance System

Introduction

Health risk behaviors and lack of preventive care are associated with higher rates of morbidity and mortality. Monitoring of modifiable risk factors for diseases and the use of preventive health services is vital to planning, initiating, and developing targeted education and intervention programs at the state and local level as well as tracking progress toward achieving health objectives and improving the health of the public. The Behavioral Risk Factor Surveillance System (BRFSS) is an ongoing surveillance program developed and partially funded by the Centers for Disease Control and Prevention (CDC). It is designed to estimate the prevalence of risk factors for the major causes of morbidity and mortality in the United States. The survey provides state-specific estimates of the proportion of adults aged 18 and over reporting health risk behaviors. For certain state and national objectives, BRFSS is the only source of data.

Idaho has participated in the BRFSS since its inception in 1984. Since then, the program has grown to encompass all 50 states and several U.S. territories. BRFSS data are valued at the state and national level for measuring progress toward national and state health objectives. BRFSS is unique in providing data that enable state health policymakers to assess their own states' needs and determine progress toward goals. Results from BRFSS have been used to support risk reduction and disease prevention activities by directing program planning, assessing trends, and targeting relevant population groups. This report summarizes major health risk behaviors and use of preventive health practices that affect chronic diseases associated with morbidity and mortality in Idaho. Summarized data in this report are not inclusive of all data that may be provided by BRFSS. For this reason, the 2004 questionnaire appears in its entirety in Appendix B.

Methodology

The BRFSS is conducted as a random telephone survey of the non-institutionalized adult population. In order to produce health district estimates, Idaho's sample has grown in size from 600 people in 1984 to approximately 4,900 beginning in 1997. The survey is administered in every month of the calendar year. After annual data collection is complete, individual responses are weighted to be representative of the state's adult population and analysis is performed on the weighted data.

Additional information regarding BRFSS methodology is available online at <http://www.cdc.gov/brfss>.

Sampling: Idaho used disproportionate stratified sampling for its 2004 BRFSS. The sample was stratified by Idaho's seven public health districts. Approximately 700 Idahoans were interviewed within each health district, resulting in a total

sample size of 5,072. Interviews were conducted by telephone using computer-assisted telephone interviewing (CATI) software to record responses.

Weighting: The data were weighted to the respondent's probability of selection as well as age and sex based on 2004 population estimates. For example, some households have more than one telephone line and are more likely to be called. The weighting corrects for this difference in probability of selection as well as differences between the population and the sample.

Analysis: Idaho used SUDAAN® (Survey Data Analysis) software for statistical testing and calculation of standard errors. This software takes into account the complex sampling design methodology of BRFSS. Idaho used SAS® software for data manipulation and risk factor creation. The formula for confidence interval calculation is as follows: Confidence Interval = Prevalence Estimate +/- (1.96*Standard Error). All "don't know," "not sure," and "refused" responses have been excluded from the analysis.

Reporting

Prevalence estimates based on denominators with fewer than 50 respondents have been suppressed and are indicated in the data tables with an asterisk (*). The BRFSS has adopted this standard to maintain a high degree of reliability. Differences between estimates are reported throughout the document. Any difference determined to be statistically significantly different through statistical testing was designated as such and will be preceded by the words "significantly" or "statistically."

Data Limitations

Errors in estimation are a result of BRFSS data being self-reported and certain behaviors possibly being underreported (Centers for Disease Control and Prevention, 2004). Another source of error is based on sampling. Each sample drawn will deviate somewhat from the population. Additional possible errors may occur due to the population from which the sample is drawn. Ideally, all adults aged 18 and older would be potential respondents for the survey. However, in order to be cost effective, the sample is limited to adults aged 18 and older who are non-institutionalized, live in a household with a non-cellular telephone, and can communicate in English. This excludes people in prisons and dormitories, non-English speakers, those without non-cellular telephones and others who cannot communicate by telephone. Telephone coverage varies by subpopulation. The Federal Communications Commission research suggests that minorities and the poor are less likely to have a telephone in the home than are non-minorities and the affluent (Federal Communications Commission, 2003). An estimated 95.7 percent of occupied households in Idaho have telephone service (2004 American Community Survey). Data on telephone coverage in U.S. households are available at <http://factfinder.census.gov>

Summary Results

General Health Status (page 8)

- The percentage of Idaho adults reporting their health as “fair” or “poor” (less than “good”) was 12.5 percent in 2004.
- Those over age 65 were more likely to report “fair” or “poor” health status as were the unemployed and those with less than a high school education.
- Idahoans who did not engage in leisure time physical activity were more likely to report less than “good” health.

Health Care Coverage (page 10)

- In Idaho, 15.5 percent of adults did not have health care insurance coverage.
- Nearly all (98.8 percent) Idahoans aged 65 and over had some kind of health care coverage while adults in the 18 to 34 year category were significantly less likely than those in other age groups to have coverage.

Dental Insurance (page 12)

- Around four-in-ten Idaho adults had no dental insurance. There has been little change in the percentage of adults without dental insurance since 1995, although the percentage without dental insurance in 1997 was significantly higher than at any other year for which data are available.
- More than seven-in-ten Idaho seniors (65 and older) were without dental coverage in 2004.

Diabetes (page 14)

- Adult diabetes prevalence was 6.2 percent in 2004, up 72 percent since 1995.
- Diabetes prevalence was higher among those:
 - Over age 55.
 - With less than a college education.
 - Who were obese (BMI \geq 30).

Summary Results

Asthma (page 16)

- Asthma prevalence (those with current asthma) was 7.9 percent in 2004 and was significantly higher among females (9.7 percent) than males (6.0 percent).
- Asthma prevalence did not differ significantly by age group.
- Idaho adults in lower income households (below \$15,000) were significantly more likely to have asthma.

Physical Activity (page 18)

- Fewer than one-in-five adults did not participate in leisure time physical activity. The ten year trend does not reveal any significant changes overall in Idaho's physical activity levels.
- Idaho adults residing in Health District 4 were significantly more likely to participate in leisure time physical activity than adults residing in other health districts.

Weight (page 20)

- After rising steadily over the past decade, the prevalence of overweight (BMI \geq 25) in 2004 remained similar to that seen in 2003, leveling out at 58.2 percent.
- About one-in-five Idahoans were obese (BMI \geq 30) in 2004, which is similar to the rate seen in recent years. Over one-in-three overweight adults were also obese.
- Obese adults were significantly more likely than those who were not overweight to report "fair" or "poor" health.
- Idaho adults categorized as overweight were:
 - Significantly less likely to participate in leisure time physical activity than those who were not overweight.
 - Significantly more likely to have diabetes and asthma.

Summary Results

Cigarette Smoking (page 24)

- Prevalence of cigarette smoking declined in 2004 (to 17.4 percent), reaching its lowest point in a decade.
- Those with lower education and income levels were significantly more likely to smoke cigarettes.
- Cigarette smokers were:
 - Significantly more likely to have “fair” or “poor” general health.
 - Significantly less likely to have health insurance coverage.

Smokeless Tobacco Use (page 26)

- In 2004, 5.0 percent of Idahoans used smokeless tobacco. This rate was similar regardless of income, education and employment status.

Alcohol Consumption (page 28)

- The prevalence of binge drinking (consuming five or more alcoholic beverages on a single occasion) declined significantly since 2003, down to 12.8 percent.
- Heavy drinking prevalence (consuming 60 or more alcoholic beverages in the past 30 days) was 4.8 percent. This was not a significant change from 2003. The percentage who engaged in heavy drinking was up significantly since 1995.
- Males were significantly more likely to be binge drinkers than females and reported heavy drinking about four times as often as females.
- Adults who reported binge drinking were significantly more likely to smoke cigarettes, as well.

Summary Results

Illicit Drug Use (page 32)

- The percentage of Idaho adults using illicit drugs for non-medical reasons was 5.8 percent in 2004 and has changed very little in recent years.
- Those aged 18 to 24 were significantly more likely to have used illicit drugs in the last 12 months compared with those in other age groups.
- Idaho adults who used illicit drugs within the last 12 months reported cigarette smoking more than twice as often as adults who had not used drugs.

Colorectal Cancer Screening (page 34)

- The percentage of Idaho adults aged 50 and older who had not had a sigmoidoscopy or colonoscopy to screen for colorectal cancer decreased in 2004 to a new low of 52.5 percent. This represents a 14.8 percent decrease from the 1995 percentage of 61.6.
- Males and females did not differ significantly with regard to receiving sigmoidoscopy or colonoscopy.
- Those aged 65 and older were significantly more likely to not have been screened compared with those 50 to 64. This difference was observed in gender specific age groups as well.

Breast Cancer Screening (page 36)

- In 2004, 40.7 percent of Idaho females over 40 had not had a mammogram and clinical breast exam within the last two years. This was not significantly different from any year since 1995.
- Women age 40 and over without health care coverage were significantly less likely to have had mammograms and clinical breast exams compared with women who had health coverage.

Summary Results

Cervical Cancer Screening (page 38)

- The percentage of women who had not had a Pap smear within the prior three years increased to the highest level in the past 10 years in 2004, to 21.8 percent.
- Women in the youngest (18 to 24) and oldest (65 and over) age categories were the least likely to have received a Pap smear within the prior three years.
- Those with lower levels of education and income were less likely to have received a Pap smear within the prior three years.

Prostate Cancer Screening (page 40)

- About one-half (52.0 percent) of men aged 40 and older had not received a Prostate-Specific Antigen (PSA) test in the last two years. This rate has not changed significantly since 2001.
- The percentage of men receiving a PSA test increased with age. Around three-in-four men aged 70 and older had received a PSA test in the past two years compared with about one-in-four of those aged 40 to 49.
- Males aged 40 and older without health care coverage were significantly less likely to have had a PSA test in the prior two years compared with those who did have coverage.

Dental Visits (page 42)

- The number of adults who had not visited a dentist in the prior year has consistently been around one-in-three since 1995. In 2004, 33.4 percent had not had a dental visit in the prior year.
- Likelihood of an annual dental visit increased along with income and level of education.
- Those without dental insurance were significantly less likely to visit a dentist in the past year compared with those who had dental insurance.

General Health

General Health Status

Respondents were asked to rate their health as “excellent,” “very good,” “good,” “fair,” or “poor.” In 2004, the percentage of adults self-reporting their general health as “fair” or “poor” was 12.5 percent. The slight decrease since 2003 is not statistically significant.

**Percent of Idaho adults who reported their general health status
as "fair" or "poor"
1995-2004**

Residents living in Health District 2 were significantly more likely than Idaho adults overall to report less than “good” general health. Residents in Health District 4 were significantly more likely to report “good” or better general health.

**Percent of Idaho adults who reported their general health status
as "fair" or "poor," 2004
Health District**

General Health

General Health Status

Overall, women and men did not differ significantly with respect to general health status in 2004. Among those in the 18 to 34 age category, 5.4 percent reported their health as less than “good” which was significantly lower than other age categories. Those over 65 were more likely to report their health as less than “good” (26.5 percent) when compared with all other ages.

**Percent of Idaho adults who reported their general health status
as “fair” or “poor,” 2004
Age and Sex**

Other Highlights:

- Adults who were employed were significantly less likely to report “fair” or “poor” health (6.3 percent) when compared with other employment categories (17.7 percent of unemployed and 23.9 percent of “other”—which includes students, homemakers, retirees and those unable to work).
- About one-in-four (24.3 percent) of those with less than a high school diploma reported having “fair” or “poor” health compared with 6.4 percent of those with a college degree.
- Idahoans who were obese ($\text{BMI} \geq 30$) reported “fair” or “poor” health more than twice as often as those who were not obese (22.6 percent of the obese compared with 9.9 percent of those who were not obese).
- Those with no reported leisure time physical activity were significantly more likely to report “fair” or “poor” health than those who participated in leisure time physical activity (29.7 percent of those with no physical activity compared with 8.5 percent who did participate in physical activity).

General Health

Health Care Coverage

In 2004, 15.5 percent of adults in Idaho had no health care insurance coverage. Levels of coverage have not changed significantly since 1995.

**Percent of Idaho adults without
health care coverage
1995-2004**

Idaho adults living in Health District 1 were significantly more likely than those in Health District 4 (19.6 percent compared with 11.7 percent) to report having no health care coverage in 2004. There were no other significant differences between Health Districts in health care coverage.

**Percent of Idaho adults without
health care coverage, 2004
Health District**

General Health

Health Care Coverage

In 2004, no difference in health care coverage existed between males and females. However, there were significant differences among age groups. While nearly all (98.8 percent) Idahoans aged 65 and over had some kind of health care coverage, adults in younger age categories were significantly less likely to have coverage.

Percent of Idaho adults without health care coverage, 2004
Age and Sex

Other Highlights:

- Idaho adults with no high school diploma reported being without health care coverage more than five times as often as those with a college degree (28.1 percent compared with 5.3 percent).
- More than one-in-four (27.9 percent) Idahoans with incomes below \$25,000 reported being without health insurance. This compares with about one-in-ten (9.8 percent) of those with incomes of \$25,000 or higher.
- Those who did not have health insurance reported smoking cigarettes more than twice as often as insured Idaho adults (32.3 percent of the uninsured compared with 14.6 percent of those with health insurance).
- Idaho adults without health coverage were significantly less likely to engage in leisure time physical activity than those with health coverage (23.7 percent of the uninsured did not engage in physical activity compared with 18.0 percent of those who had health insurance).

General Health

Dental Insurance

In 2004, 43.5 percent of Idaho adults had no dental insurance. The percentage of adults without dental insurance has remained fairly flat over the past ten years.

**Percent of Idaho adults who did not have dental insurance
1995-2004**

Breaks in the trendline indicate data are not available for those years

Health District 4 had a significantly lower percentage (33.8 percent) while District 1 and District 5 had significantly higher percentages (51.8 percent and 51.9 percent, respectively) of adults without dental insurance when compared with the state overall.

**Percent of Idaho adults who did not have
dental insurance, 2004
Health District**

General Health

Dental Insurance

While there were no significant differences between males and females in dental insurance coverage, differences were observed between age categories. Nearly three-in-four (73.6 percent) of Idaho residents over the age of 65 were without dental insurance in 2004. Those in the 35 to 54 age category were significantly less likely to be without dental insurance (32.6 percent) than other age categories.

Percent of Idaho adults who did not have dental insurance, 2004
Age and Sex

Other Highlights:

- More than one-half (57.5 percent) of Idaho adults with less than a high school education were without dental insurance. This compares with less than one-third (30.5) of college graduates.
- Those without dental insurance were significantly more likely than those with dental insurance to report their general health status as “fair” or “poor” (18.2 percent compared with 8.2 percent).
- Over nine-in-ten (92.9 percent) Idaho adults without health care insurance were also without dental insurance.
- Dental insurance coverage was positively related to household income. About seven-in-ten (69.4 percent) Idaho adults with incomes below \$15,000 did not have dental insurance. Among Idahoans with incomes of \$50,000 or more, nearly one-in-four (23.1 percent) were without dental insurance.

Chronic Disease Prevalence

Diabetes

Following national trends of increasing prevalence, Idaho adult diabetes prevalence for 2004 was significantly higher than any year prior to 1999. Since 1995, the percentage of Idaho adults with diabetes has increased 72.2 percent (from 3.6 percent to 6.2 percent).

**Percent of Idaho adults who had ever been told
they have diabetes
1995-2004**

There were few significant differences by Health District related to diabetes prevalence. However, prevalence was significantly higher in District 6 (8.9 percent) compared with Health District 1 (4.6 percent) and Health District 4 (4.3 percent).

**Percent of Idaho adults who had ever been told
they have diabetes, 2004
Health District**

Chronic Disease Prevalence

Diabetes

Males and females were equally likely to have been diagnosed with diabetes (6.0 percent for males, and 6.3 percent females). Adults over the age of 65 were significantly more likely to have ever been diagnosed with diabetes (15.9 percent) when compared with any other age category. For both sexes, the prevalence of diabetes increased with age.

**Percent of Idaho adults who had ever been told
they had diabetes, 2004
Age and Sex**

Other Highlights:

- Significant differences in diabetes prevalence existed by education level. Idaho adults with some college or less education reported diabetes diagnosis more than twice as often as those with a college degree (7.3 percent compared with 3.3 percent).
- Four-in-ten (40.2 percent) Idaho adults with diabetes reported “fair” or “poor” general health compared with about one-in-ten (10.7 percent) of those without diabetes.
- Obese (BMI \geq 30) adults reported diabetes four times as often as those who were not obese (14.8 percent compared with 3.7 percent).
- Those who reported no leisure time physical activity reported diabetes at more than twice the rate of those who engaged in some leisure time physical activity (11.0 percent compared with 5.0 percent).

Chronic Disease Prevalence

Asthma

Prior to 2002, the Idaho BRFSS reported asthma prevalence as those who had ever been told they had asthma. Since 2002, Idaho began reporting asthma prevalence as those adults who had ever been told they had asthma and still had it. Asthma prevalence has remained level since 1999. In 2004, 7.9 percent of Idaho adults had asthma.

Asthma prevalence ranged from a high of 9.5 percent in Health District 3 and a low of 6.5 percent in Health District 7. There were no significant differences between districts.

Chronic Disease Prevalence

Asthma

Current asthma prevalence in 2004 was significantly higher among females (9.7 percent) than males (6.0 percent). Asthma prevalence did not differ significantly by age.

**Percent of Idaho adults who were diagnosed
and still had asthma, 2004
Age and Sex**

Other Highlights:

- Education and employment status did not seem to be related to asthma prevalence. There were no significant differences in asthma prevalence by level of education or employment status.
- Idaho residents with incomes below \$15,000 per year were significantly more likely (14.1 percent) to have asthma than those in higher income categories (7.4 percent).
- Over one-in-four adults with current asthma (27.8 percent) reported their general health status as “fair” or “poor.” This compares with just over one-in-ten adults (11.1 percent) who did not have asthma.
- While smokers reported having asthma slightly more often than non-smokers, the difference was not significant (8.7 percent of smokers compared to 7.7 percent of non-smokers).

Health Risk Behaviors

Physical Activity

The percentage of Idaho adults who did not participate in leisure time physical activity did not change significantly in the past ten years. Just under one-in-five adults (18.8 percent) participated in physical activity in 2004.

**Percent of Idaho adults who did not participate in
leisure time physical activity
1996-2004**

Breaks in the trendline indicate data are not available for those years

Idaho adults residing in Health District 4 were significantly more likely to participate in leisure time physical activity compared with the rest of the state. Those in Health District 3 and Health District 5 were the least likely to participate in leisure time physical activity.

**Percent of Idaho adults who did not participate in leisure time
physical activity, 2004
Health District**

Health Risk Behaviors

Physical Activity

No significant difference existed between male and female participation in leisure time physical activity in 2004. Those in younger age categories were more likely to participate in physical activity than older adults. Adults over 55 reported not participating in physical activity twice as often as adults aged 18 to 34 (26.1 percent compared with 12.8 percent).

Percent of Idaho adults who did not participate in leisure time physical activity, 2004
Age and Sex

Other Highlights:

- Leisure time physical activity differed significantly by income and education levels. Close to three-in-ten (29.3 percent) adults with incomes of less than \$15,000 did not participate in leisure time physical activity compared with one-in-ten (10.2 percent) of those with an income of \$50,000 or more. Adults with less than a high school education reported no leisure time physical activity nearly four times as often as those with a college degree (34.0 percent compared with 9.3 percent).
- About three-in-ten (29.7 percent) adults with no leisure time physical activity reported “fair” or “poor” general health status compared with fewer than one-in-ten (8.5 percent) of those with leisure time physical activity.
- Obese (BMI \geq 30) adults were significantly more likely to report no leisure time physical activity when compared with those who were not obese (26.7 percent of the obese compared with 16.2 percent).

Health Risk Behaviors

Weight

Body Mass Index

Body Mass Index (BMI) is an index based on height and weight used to categorize an adult as not overweight or obese, overweight, or obese. BMI is calculated using the following formula:

$$\frac{\text{Weight in kilograms}}{(\text{Height in meters})^2}$$

The following table illustrates common category breakouts based on BMI and used by BRFSS.

BMI Category	BMI
Not Overweight or Obese*	< 25.0
Overweight**	25.0 +
Obese	30.0 +

*Note: The category “Not Overweight or Obese” also includes adults who are underweight based on BMI (< 18.5). Although underweight is a recognized health risk, only 1.0 percent of Idaho’s adult population fall into the underweight category.

**Note: The category Overweight *includes* the category Obese.

Health Risk Behaviors

Weight

Overweight and Obesity Trends

After rising steadily over the past ten years, the percentage of adults who were overweight leveled out at 58.2 percent in 2004. The slight drop in overweight prevalence since 2003 was not significant.

Over one-in-five Idaho adults was obese in 2004. In the last ten years, the percentage of adults in Idaho who were obese has increased 48.6 percent from 14.2 in 1995 to 21.1 in 2004.

In 2004, 36.2 percent of overweight Idahoans were also obese. The percentage of overweight adults who were also obese has increased significantly since 1995 (27.6 percent of the overweight were also obese in 1995).

*Results for overweight and obese may differ from previous publications due to revisions in risk factor calculation

Health Risk Behaviors

Weight

Overweight prevalence ranged from a high of 60.5 percent in Health District 5 to a low of 54.3 percent in Health District 4, but there were no significant differences between districts. Obesity prevalence in Health District 4 (16.8 percent) was significantly lower than in Health District 3 (24.0 percent) and Health District 7 (25.9 percent).

Percent of Idaho adults who were overweight and/or obese, 2004
Health District

Males were significantly more likely to be overweight (67.0 percent) than females (49.2 percent) in 2004. Idaho adults aged 18 to 24 were significantly less likely to be overweight (36.6 percent) when compared with other age groups.

Percent of Idaho adults who were overweight, 2004
Age and Sex

Health Risk Behaviors

Weight

Males (22.0 percent) and females (20.1 percent) did not differ significantly in obesity prevalence. Adults aged 18 to 24 had a significantly lower prevalence (10.7 percent) compared with older age categories. Obesity prevalence increased with age until the age 65 and over category, where the rate dropped significantly (to 20.0 percent).

Percent of Idaho adults who were obese, 2004
Age and Sex

Other Highlights:

- Overweight and obesity rates did not appear to be related to socio-economic factors. The percentage of adults who were overweight or obese was consistent across various levels of income, employment status and education.
- Overweight and obese adults were significantly more likely than those who were not overweight to report their general health as less than “good” (15.1 percent of the overweight and 22.6 percent of the obese, compared with 9.0 percent of those who were not overweight or obese).
- Overweight adults were significantly more likely than those who were not overweight to report they did not participate in any kind of leisure time physical activity (20.1 percent compared with 16.1 percent).
- Idaho adults categorized as overweight or obese were significantly more likely than those who were not overweight or obese to have diabetes. Prevalence of diabetes was 14.8 percent among the obese, 8.6 percent among the overweight and 2.5 percent among those who were not overweight.

Health Risk Behaviors

Cigarette Smoking

The prevalence of cigarette smoking among Idaho adults was 17.4 percent in 2004. This was the lowest level in the past decade and a significant drop from the peak level (22.3 percent) in 2000.

In 2004, there was little difference in cigarette smoking prevalence between health districts. However, Health District 7 had a significantly lower percentage of smokers (12.2 percent) compared with the rest of the state.

Health Risk Behaviors

Cigarette Smoking

In 2004, males and females had a similar likelihood of smoking (19.2 percent of males and 15.7 percent of females were smokers). Adults over the age of 65 were significantly less likely to smoke (7.5 percent) than those in younger age categories. There were no other significant differences in smoking rates related to age.

Other Highlights:

- As level of education increased, smoking prevalence decreased significantly. More than one-in-three (38.3 percent) of those with less than a high school education smoked cigarettes compared with 7.0 percent of college graduates.
- Adults with incomes below \$25,000 were significantly more likely to smoke cigarettes. More than one-in-four (28.6 percent) of those with incomes below \$15,000 smoked while about one-in-ten (9.6 percent) of those with incomes above \$50,000 did.
- Unemployed Idahoans were significantly more likely to smoke than the employed (34.1 percent of the unemployed compared with 17.9 percent of the employed).
- Close to one-in-five (19.1 percent) smokers had “fair” or “poor” general health compared with 11.1 percent of non-smokers. Smokers reported being without health care coverage more than twice as often as non-smokers (28.8 percent compared with 12.7 percent).

Health Risk Behaviors

Smokeless Tobacco Use

The percentage of Idaho adults using smokeless tobacco products reached a decade high of 5.0 percent in 2004. However, this was not a significant increase over 2003 levels.

**Percent of Idaho adults who used smokeless tobacco
1995-2004**

Breaks in the trendline indicate data are not available for those years

In 2004, no Health District differed significantly from the rest of the state in smokeless tobacco use. The prevalence of smokeless tobacco use ranged from a low of 3.2 percent in Health District 7 to a high of 8.0 percent in Health District 3.

**Percent of Idaho adults who used smokeless tobacco, 2004
Health District**

Health Risk Factors

Smokeless Tobacco Use

Males were significantly more likely to use smokeless tobacco products (9.9 percent) than females (0.3 percent). Those aged 25 to 34 (7.0 percent) and aged 35 to 44 (7.9 percent) were significantly more likely to report smokeless tobacco use than adults in other age categories. Adults aged 55 and older were significantly less likely to use smokeless tobacco (2.3 percent) than younger adults.

Percent of Idaho adults who used smokeless tobacco, 2004
Age and Sex

Other Highlights:

- Unlike cigarette smoking, there were no significant differences in smokeless tobacco use by income, employment or education in 2004.
- Smokeless tobacco users were not significantly more likely to also smoke cigarettes compared with those who did not use smokeless tobacco. One-in-four (24.7 percent) smokeless tobacco users also smoked cigarettes compared with 17.0 percent of non-users.

Health Risk Behaviors

Alcohol Consumption

The percentage of adults who are at risk for binge drinking (consuming five or more alcoholic beverages on one occasion in the last 30 days) declined significantly in 2004 to 12.8 percent.

**Percent of Idaho adults who were binge drinkers
1995-2004**

Minor changes have been made to the trend line to correct data entry errors from previous editions

Idaho adults living in Health District 2 (20.6 percent) were significantly more likely than those in the rest of the state to engage in binge drinking. District 7 had a significantly lower prevalence of binge drinking compared with the rest of the state.

**Percent of Idaho adults who were binge drinkers, 2004
Health District**

Health Risk Behaviors

Alcohol Consumption

The slight decline in prevalence of heavy drinking (consuming 60 or more alcoholic beverages in the last 30 days) between 2003 and 2004 was not significant. Since 1995, heavy drinking has increased significantly (from 2.8 percent to 4.8 percent).

**Percent of Idaho adults who were heavy drinkers
1995-2004**

Heavy drinking did not vary significantly by health district. Prevalence of heavy drinking ranged from a high of 5.6 percent (in Health Districts 1, 2, and 4) to a low of 2.9 percent (in Health District 6).

**Percent of Idaho adults who were heavy drinkers, 2004
Health District**

Health Risk Behaviors

Alcohol Consumption

Males were significantly more likely to be at risk for binge drinking (19.8 percent) than females (6.0 percent). Binge drinking prevalence varied considerably by age group. Those aged 18 to 34 had a significantly higher prevalence (20.3 percent) of binge drinking compared with older adults. The percentage of those who engaged in binge drinking dropped off significantly past the age of 55 (to 4.2 percent).

Percent of Idaho adults who were binge drinkers, 2004
Age and Sex

The percentage of males who engaged in heavy drinking was 4.2 times higher than the percentage of females (7.9 percent compared with 1.9 percent). Age was not a factor in heavy drinking for either sex.

Percent of Idaho adults who were heavy drinkers, 2004
Age and Sex

Health Risk Behaviors

Alcohol Consumption

Other Highlights:

- In 2004, 13.8 percent of Idahoans under the legal drinking age (18 to 20) reported binge drinking in the last 30 days. Within that same age group, 6.7 percent reported heavy drinking.
- Adults who reported binge drinking in 2004 were significantly more likely than those who did not to smoke cigarettes (36.9 percent of binge drinkers compared with 14.5 percent).
- Those who engaged in heavy drinking reported smoking 3.0 times as often as those who did not report heavy drinking (47.2 percent of heavy drinkers compared with 15.8 percent).
- No significant differences in heavy or binge drinking were seen between income, employment, or education categories.

Health Risk Behaviors

Illicit Drug Use

The percentage of Idaho adults using illicit drugs for non-medical reasons has not changed significantly in the last three years. In 2004, 5.8 percent of Idaho adults had used illicit drugs in the prior 12 months. Drug use includes all drugs not prescribed by a doctor or used to get high or for curiosity. This includes marijuana, cocaine (including crack), heroin or other opiates (codeine, demerol), and methamphetamines.

*Question wording changes make data prior to 2002 not comparable with 2002 and later.

The percentage of adults who used illicit drugs in the last 12 months ranged from a high of 7.5 percent in Health District 4 and a low of 3.1 percent in Health District 6. District 6 was the only health district that differed significantly from the rest of the state.

Health Risk Behaviors

Illicit Drug Use

Males were not significantly more likely to have used illicit drugs in the last 12 months (7.0 percent) compared with females (4.5 percent). Among age groups, adults aged 18 to 24 were significantly more likely to have reported drug use (15.1 percent) than adults in all other age categories. Prevalence of illicit drug use dropped by 48 percent after the age category of 18 to 24 and continued to decline among older age categories for both genders.

Other Highlights:

- Idaho adults who were unemployed in 2004 were significantly more likely to have used illicit drugs in the last 12 months (13.7 percent) than those who were employed (6.2 percent) or in the “other” employment category which includes students, retirees, homemakers, or those unable to work (3.9 percent).
- About one-in-three (32.7 percent) adults who reported illicit drug use in the previous 12 months did not have health care coverage compared with 14.4 percent of those who did not report illicit drug use.
- Idaho adults who used illicit drugs within the last 12 months reported smoking cigarettes 2.6 times as often as those who did not use illicit drugs (40.9 percent compared with 15.9 percent).
- Adults with incomes below \$25,000 reported illicit drug use more than 2.4 times as often as those with incomes of \$50,000 or higher (9.7 percent compared with 4.0 percent).

Preventive Behaviors

Colorectal Cancer Screening

In 2004, the percentage of Idaho adults aged 50 and older who had never had a sigmoidoscopy or colonoscopy to screen for colorectal cancer decreased to a ten year low of 52.5 percent. This represents a 14.8 percent decrease since 1995.

Percent of Idaho adults aged 50 and older who had never had a sigmoidoscopy or colonoscopy, 1995-2004

Breaks in the trendline indicate data are not available for those years

Nearly two-in-three (63.8 percent) of adults over 50 residing in Health District 6 had never had a sigmoidoscopy or colonoscopy. This was significantly higher than any other district. There were no other significant differences by health district related to colorectal cancer screening.

Percent of Idaho adults aged 50 and older who had never had a sigmoidoscopy or colonoscopy, 2004
Health District

Preventive Behaviors

Colorectal Cancer Screening

Overall, males and females were equally likely to have had screenings for colorectal cancer. Around one-half of males (51.8 percent) and females (53.2 percent) had never had a sigmoidoscopy or colonoscopy. There were significant differences between age categories, however. Those aged 50 to 64 were significantly more likely to not have been screened (61.2 percent) than those aged 65 and older (40.1 percent). This difference was reflected in gender specific age groups as well.

Other Highlights:

- Health care coverage status was a significant factor in colorectal cancer screening. Idaho adults aged 50 and over who did not have health insurance coverage reported never having a sigmoidoscopy or colonoscopy 1.6 times as often as those who did have coverage (78.2 percent compared with 49.9 percent).
- No significant differences were observed between employment, education or income categories in rates of colorectal cancer screening.

Preventive Behaviors

Breast Cancer Screening

The National Cancer Institute recommends that women aged 40 and above receive screening for breast cancer with mammography every one to two years. The percentage of Idaho women aged 40 and older not receiving mammograms and clinical breast exams within the last two years has not changed significantly over the past ten years. In 2004, approximately four-in-ten women aged 40 and over had received breast cancer screening in the prior two years.

Percent of Idaho females aged 40 and older who had not had a mammogram and clinical breast exam within the last two years 1995-2004

In 2004, there were few significant differences between Health Districts with regard to breast cancer screening. The exception was Health District 4 which had a significantly lower percentage of women aged 40 and over who had not received the recommended screening compared with Health Districts 1, 5 and 7.

Percent of Idaho females aged 40 and older who had not had a mammogram and clinical breast exam within the last two years, 2004
Health District

Preventive Behaviors

Breast Cancer Screening

There were no significant differences in breast cancer screening between the various 40 and over age categories. The percentage of Idaho females who had not received a mammogram and clinical breast exam within the last two years ranged from 37.3 percent of those aged 50 to 64 to 45.5 percent of those aged 40 to 49.

Other Highlights:

- The percentage of adult females aged 40 and over receiving a breast cancer screening by mammogram and clinical breast exam increased with household income. Those with incomes below \$15,000 reported not having a mammogram and clinical breast exam in the previous two years nearly twice as often as those with incomes above \$50,000 (56.6 percent compared with 27.7 percent).
- Just over one-in-four (28.5 percent) 40-plus women with college degrees reported not having mammograms and breast exams compared with around six-in-ten (57.9 percent) 40-plus women with less than a high school education.
- About two-thirds (66.1 percent) of women aged 40 and over who did not have health insurance reported that they did not have breast cancer screening compared with about one-third (37.3 percent) of 40-plus women with health insurance.

Preventive Behaviors

Cervical Cancer Screening

The percentage of women with an intact cervix who had not received a Pap test in the previous three years increased significantly between 2002 and 2004 to 21.8 percent. This was the highest level in the past ten years.

Percent of Idaho females who had not had a Pap smear within the last three years, 1995-2004

Women residing in Health District 7 were significantly more likely than those in the rest of the state to have not had cervical cancer screening with close to one-in-three (32.1 percent) reporting no Pap smear in the previous three years. Those in District 4 were the least likely to have not had cervical cancer screening (13.6 percent).

Percent of Idaho females who had not had a Pap smear within the last three years, 2004

Preventive Behaviors

Cervical Cancer Screening

There were significant differences by age in the percentage receiving screening for cervical cancer through Pap smear tests. Women aged 25 to 44 were significantly less likely to have not received a Pap smear test within the last three years (12.2 percent) when compared with all other age categories. Women in the youngest (18 to 24 years) and oldest (65 years and over) age categories were the most likely to have not had cervical cancer screening.

Percent of Idaho females who had not had a Pap smear within the last three years, 2004
Age Groups

Other Highlights:

- Women with household incomes greater than \$50,000 were significantly less likely than those in lower income brackets to have not had a Pap smear test within the prior three years (12.1 percent). By comparison, over one-in-three (37.4 percent) of those with incomes below \$15,000 reported not having a Pap smear test.
- College graduates were significantly less likely to have not received a Pap smear test in the previous three years (10.8 percent) when compared with all other education levels (less than high school, 35.3 percent; high school graduates, 31.1 percent; some college, 19.6 percent).

Preventive Behaviors

Prostate Cancer Screening

In 2004, about one-half (52.0 percent) of Idaho males aged 40 and older had not received a Prostate-Specific Antigen (PSA) test in the previous two years. This was not a significant change since 2002.

Percent of Idaho males aged 40 and older who had not had a PSA test within the last two years, 2001-2004

Breaks in the trendline indicate data are not available for those years

Prostate cancer screening through PSA tests did not differ significantly by Health District. Although males aged 40 and over in Health District 4 were the least likely to report not having a PSA test, the difference was not statistically significant compared with the rest of the state.

Percent of Idaho males aged 40 and older who had not had a PSA test within the last two years, 2004

Health District

Preventive Behaviors

Prostate Cancer Screening

Prostate cancer screening rates differed significantly by age. Around one-in-four (24.6 percent) men aged 70 and older had not received a PSA exam in the prior two years. This compares with over three-in-four (76.6 percent) men aged 40 to 49 who had not at a PSA test. Differences between each ten year age category were statistically significant.

Other Highlights:

- Men with household incomes below \$15,000 were significantly more likely to have not received a PSA test in the last two years (67.4 percent) when compared with those in all other income categories. However, no significant differences related to PSA tests were seen between middle income and higher income categories.
- College graduates were significantly less likely to have not had a PSA test in the last two years (46.5 percent) when compared with those having less than a high school education (61.9 percent).
- About eight-in-ten (80.5 percent) of 40-plus men who did not have health insurance had not had a PSA test within the past two years. This compares with less than half (48.1 percent) of 40-plus men with health insurance.

Preventive Behaviors

Dental Visits

The percentage of Idaho adults who had not visited a dentist in the prior year remained consistent over the past ten years. In 2004, one-in-three (33.4) adults had not visited the dentist in the prior 12 months.

Adults residing in Health Districts 7 and 4 were significantly less likely than those in the rest of the state to report not visiting a dentist in the prior 12 months (26.8 percent in District 7 and 28.8 percent in District 4).

Preventive Behaviors

Dental Visits

There were no statistically significant differences by age or sex relating to dental visits in 2004. Males aged 25 to 54 were more likely to have not had a dental visit in the prior 12 months, but the difference was not significant when compared with females in the same age category.

Other Highlights:

- The percentage of adults who had not visited a dentist in the previous year decreased as income level increased. Over one-half (51.4 percent) of those with incomes below \$15,000 had not had a dental visit compared with 18.4 percent of those with incomes above \$50,000.
- Those with less than a high school education reported not having a dental visit in the past year more than twice as often as college graduates (47.0 percent compared with 20.2 percent).
- Those who did not have dental insurance were significantly more likely to report not visiting a dentist in the past year compared with those who did have dental insurance (47.0 percent compared with 22.7 percent).

Data Tables

The following section includes tabular data summaries for the 2004 BRFSS topics that were presented in the previous pages of this report. Data are displayed at the state level and the health district level and are subcategorized by selected demographic groups.

The next two pages titled, “Understanding the Data Tables” provide direction on interpreting these data tables.

Understanding the Data Tables

The data tables on the following pages provide both state and health district data for various demographic subcategories. An understanding of the tables is important to interpreting the data correctly.

- A. This title refers to the risk factor.
- B. This title refers to the population surveyed. For most questions, this will be the adult (aged 18 and over) Idaho population. However, for some calculated variables and some risk factors, the population surveyed may be a subset of adults aged 18 and over. For instance, the Breast Cancer Screening risk factor table will only include the female population aged 40 and over, since only females were asked those questions and breast cancer screening is recommended for that age group. Colorectal Cancer Screening will only include adults over the age of 50, since only they were asked questions about colorectal cancer screening. It is important to understand the population the data represent in order to accurately interpret the data in the tables.
- C. The labels across the top of the table (i.e., state and district) refer to the geographic region of residence of the population in (B). For more information on geographic break-outs, please see page iv of this report for a map of Idaho's seven public health districts.
- D. The labels on the left side of the table refer to the particular group the numbers represent. For example, the row labeled "Female" will contain data for women for the geographic region indicated at the top of the table (C). In the example table provided, the data could be interpreted (see circled data point):

"In 2004, 13.0 percent of females in Health District 1 were at risk for this risk factor."

- E. "N" refers to the number of people sampled who responded to the question within the demographic group and geographic region indicated. It does NOT represent the number of people who have the risk factor in the population. An asterisk indicates that fewer than 50 people in the group responded (see Methodology and Reporting section, pages 1-2 for explanation on sampling and suppressing data for sample sizes less than 50). In the example table provided, the data could be interpreted (see boxed data point):

"In 2004, there were 689 people in Health District 1 sampled for this risk factor."

Understanding the Data Tables

- F. The shaded columns contain the prevalence (percent) of the risk factor. This percentage is a weighted percentage and is not calculated using the sample frequencies from the column containing N. Therefore, it is not possible to calculate the prevalence by simply dividing N by the total number of people sampled for the year (see Methodology section, pages 1-2 for explanation on weighting procedures).
- G. The two numbers in the column labeled "95% CI" are the lower and upper limits of the confidence interval. Confidence intervals are a way to measure sampling error and define the range of values where the "true" percentage would be found. This interval can be interpreted to mean that there is a 95% certainty that the true prevalence of the risk factor in the population falls within the confidence interval. In the example table provided, the data could be interpreted like this:

"For this risk factor, the prevalence in Idaho was 11.7 percent in 2004. We can say, with 95 percent certainty, the actual population prevalence falls within the range of 10.6 percent to 12.8 percent."

Appendix A

Trends of Selected Risk Variables by Public Health District from 1997 Through 2004

The following tables present data for each health district for selected risk variables from the years 1997 through 2004. The year 1997 was chosen as the beginning of the trend period due to the increased sample size in 1997. The following table will help with interpretation of the variable headings:

Variable Heading	Definition	Question/Page in Appendix B
General Health	Adults who reported their General Health as "fair" or "poor"	Q1.1 p. 92
Health Care Coverage	Adults without health care coverage	Q3.1 p. 92
Dental Insurance	Adults who did not have dental insurance	ID01Q05 p.102
Diabetes	Adults who had ever been told they had diabetes	Q10.1 p. 93
Asthma	Adults who had been diagnosed and still had asthma	M9.1-M9.2 p. 100
Physical Activity	Adults who did not participate in leisure time physical activity	Q4.1 p. 92
Overweight	Adults with a BMI of 25 or greater	Q13.10, Q13.11 p. 96
Obesity	Adults with a BMI of 30 or greater	
Smoke Cigarettes	Adults who smoked cigarettes	Q7.1-Q7.2 p. 93
Smokeless Tobacco	Adults who used smokeless tobacco	ID06Q01-ID06Q02 p. 104
Binge Drinking	Adults consuming more than 5 drinks on one occasion	Q8.3 p. 93
Heavy Drinking	Adults consuming more than 60 drinks in the last 30 days	Q8.1-Q8.2 p. 93
Illicit Drug Use	Adults who had used drugs for non-medical purposes in the last 12 months	ID04Q01-ID04Q02 p. 103
Dental Visits	Adults who had not visited the dentist within the previous 12 months	Q11.1 p. 94
Colorectal Cancer Screening	Adults aged 50 and over who had never had a sigmoidoscopy or colonoscopy	Q17.1-Q17.3 p. 97-98
Breast Cancer Screening	Females aged 40 and older who have NOT had a mammogram and clinical breast exam in the last two years	Q15.1-Q15.4 p. 96-97
Cervical Cancer Screening	Females who had NOT had a Pap smear within the last three years	Q15.5-Q15.6 p. 97
Prostate Cancer Screening	Males aged 40 and older who had NOT had a PSA test within the last two years	Q16.1-Q16.2 p. 97

* Indicates data are not available for that year

¹ Prior to 2002, Idaho BRFSS reported adults who have ever been told they have asthma. Beginning in 2002, Idaho reports current asthma status.

² Results may differ from previous publications due to revisions in risk factor calculation.

³ Minor changes have been made to the trend line to correct data entry errors from previous editions.

⁴ Question wording changed from 2000 to 2001 and from 2001 to 2002.

⁵ Question wording changes make data prior to 2002 not comparable with 2002 and later

⁶ Prior to 2004, Idaho BRFSS reported all ages. Beginning in 2004, Idaho reports only women aged 40 and older.

* Indicates data are not available for that year

¹ Prior to 2002, Idaho BRFSS reported adults who have ever been told they have asthma. Beginning in 2002, Idaho reports current asthma status.

² Results may differ from previous publications due to revisions in risk factor calculation.

³ Minor changes have been made to the trend line to correct data entry errors from previous editions.

⁴ Question wording changed from 2000 to 2001 and from 2001 to 2002.

⁵ Question wording changes make data prior to 2002 not comparable with 2002 and later

⁶ Prior to 2004, Idaho BRFSS reported all ages. Beginning in 2004, Idaho reports only women aged 40 and older.

* Indicates data are not available for that year

¹ Prior to 2002, Idaho BRFSS reported adults who have ever been told they have asthma. Beginning in 2002, Idaho reports current asthma status.

² Results may differ from previous publications due to revisions in risk factor calculation.

³ Minor changes have been made to the trend line to correct data entry errors from previous editions.

⁴ Question wording changed from 2000 to 2001 and from 2001 to 2002.

⁵ Question wording changes make data prior to 2002 not comparable with 2002 and later

⁶ Prior to 2004, Idaho BRFSS reported all ages. Beginning in 2004, Idaho reports only women aged 40 and older.

* Indicates data are not available for that year

¹ Prior to 2002, Idaho BRFSS reported adults who have ever been told they have asthma. Beginning in 2002, Idaho reports current asthma status.

² Results may differ from previous publications due to revisions in risk factor calculation.

³ Minor changes have been made to the trend line to correct data entry errors from previous editions.

⁴ Question wording changed from 2000 to 2001 and from 2001 to 2002.

⁵ Question wording changes make data prior to 2002 not comparable with 2002 and later

⁶ Prior to 2004, Idaho BRFSS reported all ages. Beginning in 2004, Idaho reports only women aged 40 and older.

Appendix B

2004 Behavioral Risk Factor Surveillance System Questionnaire

In the following pages, the 2004 Idaho BRFSS questionnaire is presented in its entirety. In addition to the text of each question, the results for most of the questions are included. The number of people who responded to the question (n) is listed below the text for each question. The percent for each response category can be found in parentheses to the right of the response categories. Note also that the percentages are weighted results (see Methodology on pages 1-2) and do not directly correspond to the n's for each question. The results have not been provided for all questions.

NOTE: Care should be exercised when interpreting these results. In order to interpret the results correctly, it is important to understand what group has been asked the question. For example, in question ID01Q03 on page 105, 15.4% of the respondents have Medicare. However this question is asked only of those who respond “yes” to question Q3.1. The exclusion of certain respondents is indicated by the bold text at the beginning of question ID01Q03. These are called “skip patterns” and are used extensively throughout the survey. In order to properly identify what group has been asked a specific question, the skip pattern must be considered. In addition, there may be some confusion when trying to compare results from the appendix to those in the previous sections. The risk factors reported in the main body of the report are often constructed from the responses of multiple questions and may not be comparable to the results of one particular question.

Response categories displayed in capital letters were not read aloud. Responses of “Don’t Know” and “Refused” are excluded from the n’s, percentage, and means calculations.

For help in interpreting these results, contact the Idaho BRFSS Project Director at (208) 332-7326.

SECTION 1: HEALTH STATUS

Q1.1 Would you say that in general your health is excellent, very good, good, fair, or poor?
(n=5,060)

- 1 Excellent (22.9%)
- 2 Very good (36.8%)
- 3 Good (27.8%)
- 4 Fair (8.5%)
- 5 Poor (4.0%)
- 7 DON'T KNOW/NOT SURE
- 9 REFUSED

SECTION 2: HEALTHY DAYS - HEALTH-RELATED QUALITY OF LIFE

Q2.1 Now thinking about your physical health, which includes physical illness and injury, for how many days during the past 30 days was your physical health not good?
(n=4,977)

Mean number of days not good: 3.4

- 77 DON'T KNOW/NOT SURE
- 99 REFUSED

Q2.2 Now thinking about your mental health, which includes stress, depression, and problems with emotions, for how many days during the past 30 days was your mental health not good?
(n=4,986)

Mean number of days not good: 3.4

- 77 DON'T KNOW/NOT SURE
- 99 REFUSED

Q2.3 [IF Q2.1≠88 OR Q2.2≠88, OTHERWISE SKIP TO NEXT SECTION] During the past 30 days, for about how many days did poor physical or mental health keep you from doing your usual activities, such as self-care, work, or recreation?
(n=2,763)

Mean number of days: 3.8

- 77 DON'T KNOW/NOT SURE
- 99 REFUSED

SECTION 3: HEALTH CARE ACCESS

Q3.1 Do you have any kind of health care coverage, including health insurance, prepaid plans such as HMOs, or government plans such as Medicare?
(n=5,051)

- 1 Yes (84.5%)
- 2 No (15.5%)
- 7 DON'T KNOW/NOT SURE
- 9 REFUSED

Q3.2 Do you have one person you think of as your personal doctor or health care provider?

(n=5,059)

- 1 Yes, only one (64.0%)
- 2 More than one (9.4%)
- 3 No (26.6%)
- 7 DON'T KNOW/NOT SURE
- 9 REFUSED

Q3.3 Was there a time in the past 12 months when you needed to see a doctor but could not because of the cost?
(n=5,063)

- 1 Yes (14.7%)
- 2 No (85.3%)
- 7 DON'T KNOW/NOT SURE
- 9 REFUSED

SECTION 4: EXERCISE

Q4.1 During the past month, other than your regular job, did you participate in any physical activities or exercises such as running, calisthenics, golf, gardening, or walking for exercise?
(n=5,061)

- 1 Yes (81.2%)
- 2 No (18.8%)
- 7 DON'T KNOW/NOT SURE
- 9 REFUSED

SECTION 5: ENVIRONMENTAL FACTORS

Q5.1 The next two questions are about things in the air you breathe that may make you ill, not about an illness you can catch from other people, such as a cold. Things like dust, mold, smoke, and chemicals inside the home or office can cause poor indoor air quality.

In the past 12 months have you had an illness or symptom that you think was caused by something in the air inside a home, office, or other building?

(n=5,025)

- 1 Yes (19.8%)
- 2 No (80.2%)
- 7 DON'T KNOW/NOT SURE
- 9 REFUSED

Q5.2 Things like smog, automobile exhaust, and chemicals can cause outdoor air pollution. In the past 12 months have you had an illness or symptom that you think was caused by pollution in the air outdoors?

(n=5,023)

- 1 Yes (14.3%)
- 2 No (85.7%)
- 7 DON'T KNOW/NOT SURE
- 9 REFUSED

SECTION 6: EXCESS SUN EXPOSURE

Q6.1 The next question is about sunburns including anytime that even a small part of your skin was red for more than 12 hours. Have you had a sunburn within the past 12 months?
(n=5,051)

- 1 Yes (48.0%)
- 2 No (52.0%)
- 7 DON'T KNOW/NOT SURE
- 9 REFUSED

Q6.2 **[IF Q6.1=1, OTHERWISE SKIP TO NEXT SECTION]** Including times when even a small part of your skin was red for more than 12 hours, how many sunburns have you had within the past 12 months?

(n=2,124)

- 1 One (30.5%)
- 2 Two (31.1%)
- 3 Three (17.1%)
- 4 Four (6.2%)
- 5 Five (5.2%)
- 6 Six or more (9.8%)
- 7 DON'T KNOW/NOT SURE
- 9 REFUSED

SECTION 7: TOBACCO USE

Q7.1 Have you smoked at least 100 cigarettes in your entire life? (n=5,056)

- 1 Yes (41.0%)
- 2 No (59.0%)
- 7 DON'T KNOW/NOT SURE
- 9 REFUSED

Q7.2 **[IF Q7.1=1, OTHERWISE SKIP TO NEXT SECTION]** Do you now smoke cigarettes every day, some days, or not at all? (n=2,163)

- 1 Every day (32.5%)
- 2 Some days (10.0%)
- 3 Not at all (57.4%)
- 9 REFUSED

Q7.3 **[IF Q7.1=1 AND Q7.2<3, OTHERWISE SKIP TO NEXT SECTION]** During the past 12 months, have you stopped smoking for one day or longer because you were trying to quit smoking? (n=913)

- 1 Yes (54.4%)
- 2 No (45.6%)
- 7 DON'T KNOW/NOT SURE
- 9 REFUSED

SECTION 8: ALCOHOL CONSUMPTION

Q8.1 A drink of alcohol is 1 can or bottle of beer, 1 glass of wine, 1 can or bottle of wine cooler, 1 cocktail, or 1 shot of liquor. During the past 30 days, how many days per week or per month did you have at least one drink of any alcoholic beverage? (n=5,048)

Mean number of days in last 30: 4.0

- 777 DON'T KNOW/NOT SURE
- 888 NO DRINKS IN PAST 30 DAYS
- 999 REFUSED

Q8.2 **[IF Q8.1≠888 AND Q8.1≠999, OTHERWISE SKIP TO Q9.1]** On the days when you drank, about how many drinks did you drink on the average? (n=2,328)

Mean number of drinks: 2.3

- 77 DON'T KNOW/NOT SURE
- 99 REFUSED

Q8.3 Considering all types of alcoholic beverages, how many times during the past 30 days did you have 5 or more drinks on an occasion?

(n=2,334)

Mean number of times: 1.1

- 77 DON'T KNOW/NOT SURE
- 99 REFUSED

Q8.4 During the past 30 days, how many times have your driven when you've had perhaps too much to drink? (n=2,348)

Mean number of times: 0.1

- 77 DON'T KNOW/NOT SURE
- 99 REFUSED

SECTION 9: ASTHMA

Q9.1 Have you ever been told by a doctor, nurse or other health professional that you had asthma? (n=5,064)

- 1 Yes (13.0%)
- 2 No (87.0%)
- 7 DON'T KNOW/NOT SURE
- 9 REFUSED

Q9.2 **[IF Q9.1=1, OTHERWISE SKIP TO NEXT SECTION]** Do you still have asthma? (n=665)

- 1 Yes (62.8%)
- 2 No (37.2%)
- 7 DON'T KNOW/NOT SURE
- 9 REFUSED

SECTION 10: DIABETES

Q10.1 Have you ever been told by a doctor that you have diabetes? (n=5,070)

- 1 Yes (6.2%)
- 2 Yes, but female told only during pregnancy (0.7%)
- 3 No (92.1%)
- 4 No, pre-diabetes or borderline diabetes (1.1%)
- 7 DON'T KNOW/NOT SURE
- 9 REFUSED

MODULE 1: DIABETES

M1.1 **[IF Q10.1=1, OTHERWISE SKIP TO NEXT SECTION]** How old were you when you were told you have diabetes? (n=381)

Mean age in years: 50.3

- 98 DON'T KNOW/NOT SURE
- 99 REFUSED

M1.2 Are you now taking insulin? (n=393)

- 1 Yes (24.9%)
- 2 No (75.1%)
- 9 REFUSED

M1.3 Are you now taking diabetes pills?
(n=393)

- 1 Yes (66.6%)
- 2 No (33.4%)

- 7 DON'T KNOW/NOT SURE
- 9 REFUSED

M1.4 About how often do you check your blood for glucose or sugar? Include times when checked by a family member or friend, but do not include times when checked by a health professional.
(n=388)

Mean number of times per day: 1.4

- 777 DON'T KNOW/NOT SURE
- 888 NEVER
- 999 REFUSED

M1.5 About how often do you check your feet for any sores or irritations? Include times when checked by a family member or friend, but do not include times when checked by a health professional.
(n=385)

Mean number of times per day: 0.8

- 555 NO FEET
- 777 DON'T KNOW/NOT SURE
- 888 NEVER
- 999 REFUSED

M1.6 Have you ever had any sores or irritations on your feet that took more than four weeks to heal?
(n=391)

- 1 Yes (12.4%)
- 2 No (87.6%)

- 7 DON'T KNOW/NOT SURE
- 9 REFUSED

M1.7 About how many times in the past 12 months have you seen a doctor, nurse, or other health professional for your diabetes?
(n=377)

Mean number of times: 3.8

- 77 DON'T KNOW/NOT SURE
- 99 REFUSED

M1.8 A test for hemoglobin "A one C" measures the average level of blood sugar over the past three months. About how many times in the past 12 months has a doctor, nurse, or other health professional checked you for "A one C"?
(n=368)

Mean number of times: 2.5

- 77 DON'T KNOW/NOT SURE
- 98 NEVER HEARD OF HEMOGLOBIN A ONE C TEST
- 99 REFUSED

M1.9 **[IF M1.5#555, OTHERWISE SKIP TO M1.10]** About how many times in the past 12 months has a health professional checked your feet for any sores or irritations?
(n=387)

Mean number of times: 1.7

- 77 DON'T KNOW/NOT SURE
- 99 REFUSED

M1.10 When was the last time you had an eye exam in which the pupils were dilated? This would have made you temporarily sensitive to bright light.
(n=388)

- 1 Within the past month (< 1 month ago) (18.4%)
- 2 Within the past year (1 month but < 12 months ago) (41.9%)
- 3 Within the past 2 years (1 year but < 2 years ago) (11.2%)
- 4 2 or more years ago (24.1%)
- 8 NEVER (4.4%)
- 7 DON'T KNOW/NOT SURE
- 9 REFUSED

M1.11 Has a doctor ever told you that diabetes has affected your eyes or that you had retinopathy?
(n=390)

- 1 Yes (18.4%)
- 2 No (81.6%)
- 7 DON'T KNOW/NOT SURE
- 9 REFUSED

M1.12 Have you ever taken a course or class in how to manage your diabetes yourself?
(n=392)

- 1 Yes (54.1%)
- 2 No (45.9%)
- 7 DON'T KNOW/NOT SURE
- 9 REFUSED

SECTION 11: ORAL HEALTH

Q11.1 How long has it been since you last visited a dentist or a dental clinic for any reason?
(n=5,025)

- 1 Within the past year (< 12 months ago) (66.6%)
- 2 Within the past 2 years (1 year but < 2 years ago) (13.3%)
- 3 Within the past 5 years (2 years but < 5 years ago) (10.6%)
- 4 5 or more years ago (9.2%)
- 8 NEVER (0.3%)
- 7 DON'T KNOW/NOT SURE
- 9 REFUSED

Q11.2 How many of your permanent teeth have been removed because of tooth decay or gum disease? Do not include teeth lost for other reasons, such as injury or orthodontics.
(n=5,003)

- 1 1 to 5 (24.5%)
- 2 6 or more, but not all (8.6%)
- 3 All (5.6%)
- 8 NONE (61.4%)
- 7 DON'T KNOW/NOT SURE
- 9 REFUSED

Q11.3 [IF Q11.1#8 AND Q11.2#3, OTHERWISE SKIP TO NEXT SECTION] How long has it been since you had your teeth "cleaned" by a dentist or dental hygienist?
(n=4,627)

- 1 Within the past year (< 12 months ago) (64.9%)
- 2 Within the past 2 years (1 year but < 2 years ago) (14.2%)
- 3 Within the past 5 years (2 years but < 5 years ago) (10.6%)
- 4 5 or more years ago (8.9%)
- 8 NEVER (1.4%)
- 7 DON'T KNOW/NOT SURE
- 9 REFUSED

SECTION 12: IMMUNIZATION

Q12.1 During the past 12 months, have you had a flu shot?
(n=5,063)

- 1 Yes (31.0%)
- 2 No (69.0%)
- 7 DON'T KNOW/NOT SURE
- 9 REFUSED

Q12.2 During the past 12 months, have you had a flu vaccine that was sprayed in your nose?
(n=5,063)

- 1 Yes (0.4%)
- 2 No (99.6%)
- 7 DON'T KNOW/NOT SURE
- 9 REFUSED

Q12.3 Have you ever had a pneumonia shot? This shot is usually given only once or twice in a person's lifetime and is different from the flu shot. It is also called the pneumococcal vaccine.
(n=4,626)

- 1 Yes (22.7%)
- 2 No (77.3%)
- 7 DON'T KNOW/NOT SURE
- 9 REFUSED

SECTION 13: DEMOGRAPHICS

Q13.1 What is your age?
(n=5,051)

Mean age in years: 45.0

- 7 DON'T KNOW/NOT SURE

- 7 DON'T KNOW/NOT SURE
- 9 REFUSED

Q13.3 Which one or more of the following would you say is your race? Would you say: White, Black or African American, Asian, Native Hawaiian or Other Pacific Islander, American Indian or Alaska Native, or Other?

[SEE RESULTS FOLLOWING Q13.4]

Q13.4 [IF MORE THAN ONE RESPONSE TO Q13.3, OTHERWISE SKIP TO Q13.5] Which one of these groups would you say best represents your race?
(n=5,020)

[RESULTS ARE Q13.3 AND Q13.4 COMBINED]

- 1 White (94.3%)
- 2 Black or African American (0.5%)
- 3 Asian (1.2%)
- 4 Native Hawaiian or Other Pacific Islander (0.2%)
- 5 American Indian, Alaska Native (2.0%)
- 6 Other (1.8%)
- 7 DON'T KNOW/NOT SURE
- 9 REFUSED

Q13.5 Are you married, divorced, widowed, separated, never married, or a member of an unmarried couple?
(n=5,060)

- 1 Married (66.2%)
- 2 Divorced (9.8%)
- 3 Widowed (5.6%)
- 4 Separated (1.3%)
- 5 Never married (14.2%)
- 6 A member of an unmarried couple (3.0%)
- 9 REFUSED

Q13.6 How many children less than 18 years of age live in your household?
(n=5,072)

Mean number of children: 0.9

99 REFUSED

Q13.7 What is the highest grade or year of school you completed?
(n=5,065)

- 1 Never attended school or only kindergarten (<0.1%)
- 2 Grades 1 - 8 (Elementary) (1.3%)
- 3 Grades 9 - 11 (Some high school) (6.7%)
- 4 Grade 12 or GED (High school graduate) (31.1%)
- 5 College 1 year to 3 years (Some college or technical school) (32.6%)
- 6 College 4 years or more (College graduate) (28.2%)
- 9 REFUSED

Q13.8 Are you currently: employed for wages, self-employed, out of work for more than 1 year, out of work for less than 1 year, a homemaker, a student, retired, or unable to work?
(n=5,055)

- 1 Employed for wages (52.2%)
- 2 Self-employed (10.9%)
- 3 Out of work for more than 1 year (1.3%)
- 4 Out of work for less than 1 year (2.7%)
- 5 A homemaker (9.2%)
- 6 A student (4.6%)
- 7 Retired (15.0%)
- 8 Unable to work (4.0%)
- 9 REFUSED

Q13.9 Is your annual household income from all sources?
(n=4,545)

- 1 Less than \$10,000 (5.2%)
- 2 \$10,000 to less than \$15,000 (4.8%)
- 3 \$15,000 to less than \$20,000 (8.3%)
- 4 \$20,000 to less than \$25,000 (11.0%)
- 5 \$25,000 to less than \$35,000 (15.9%)
- 6 \$35,000 to less than \$50,000 (21.2%)
- 7 \$50,000 to less than \$75,000 (17.5%)
- 8 \$75,000 or more (16.2%)

- 3 You're not sure if you do or don't (20.0%)
- 7 DON'T KNOW/NOT SURE
- 9 REFUSED

Q18.5 **[IF Q18.4=2, OTHERWISE SKIP TO NEXT SECTION]**
How soon would you want to have a child? Would you say...
(n=492)

- 1 Less than 12 months from now (27.6%)
- 2 Between 12 months to less than two years from now (30.5%)
- 3 Between two years to less than 5 years from now (36.3%)
- 4 5 or more years from now (5.6%)
- 7 DON'T KNOW/NOT SURE
- 9 REFUSED

SECTION 19: DISABILITY

Q19.1 The following questions are about health problems or impairments you may have. Are you limited in any way in any activities because of physical, mental, or emotional problems?
(n=5,046)

- 1 Yes (18.3%)
- 2 No (81.7%)
- 7 DON'T KNOW/NOT SURE
- 9 REFUSED

Q19.2 Do you now have any health problem that requires you to use special equipment, such as a cane, a wheelchair, a special bed, or a special telephone? Include occasional use or use in certain circumstances.
(n=5,069)

- 1 Yes (5.6%)
- 2 No (94.4%)
- 7 DON'T KNOW/NOT SURE
- 9 REFUSED

SECTION 20: HIVAIDS

Q20.1 **[IF Q13.1<65, OTHERWISE SKIP TO NEXT SECTION]**
The next few questions are about the national health problem of HIV, the virus that causes AIDS. Please remember that your answers are strictly confidential and that you don't have to answer every question if you don't want to. Although we will ask you about testing, we will not ask you about the results of any test you may have had. I'm going to read two statements about HIV. After I read each one, please tell me whether you think it is true or false, or if you don't know.

A pregnant woman with HIV can get treatment to help reduce the chances that she will pass the virus on to her baby.
(n=2,612)

- 1 True (75.4%)
- 2 False (24.6%)
- 7 DON'T KNOW/NOT SURE
- 9 REFUSED

Q20.2 There are medical treatments available that are intended to help a person who is infected with HIV to live longer.
(n=3,636)

- 1 True (97.0%)
- 2 False (3.0%)
- 7 DON'T KNOW/NOT SURE
- 9 REFUSED

Q20.3 Have you ever been tested for HIV? Do not count tests you many have had as part of a blood donation.
(n=3,874)

- 1 Yes (35.2%)
- 2 No (64.9%)
- 7 DON'T KNOW/NOT SURE
- 9 REFUSED

Q20.4 **[IF Q20.3=1, OTHERWISE SKIP TO Q20.10]** In the past 12 months, how many times have you been tested for HIV, including times you did not get your results?
(n=1,333)

Mean number of times tested: 0.4

- 77 DON'T KNOW/NOT SURE
- 99 REFUSED

Q20.5 Not including blood donations, in what month and year was your last HIV test?
(n=1,159)

Data suppressed

Q20.6 I am going to read you a list of reasons why some people have been tested for HIV. Not including blood donations, which of these would you say was the MAIN reason for your last HIV test?
(n=1,338)

- 1 It was required (20.2%)
- 2 Someone suggested you should be tested (3.9%)
- 3 You thought you may have gotten HIV through sex or drug use (2.9%)
- 4 You just wanted to find out whether you had HIV (16.2%)
- 5 You were worried that you could give HIV to someone (0.4%)
- 6 You were pregnant (18.6%)
- 7 It was done as part of a routine medical check-up (21.5%)
- 8 Some other reason (16.4%)
- 77 DON'T KNOW/NOT SURE
- 99 REFUSED

Q20.7 Where did you have your last HIV test at, a private doctor or HMO, at a counseling and testing site, at a hospital, at a clinic, in a jail or prison, at a drug treatment facility, at home, or somewhere else?
(n=1,333)

- 1 Private doctor or HMO (38.2%)
- 2 Counseling and testing site (1.5%)
- 3 Hospital (18.9%)
- 4 Clinic (26.5%)
- 5 In a jail or prison (1.7%)
- 6 Drug treatment facility (0.4%)
- 7 At home (4.3%)
- 8 Somewhere else (8.5%)
- 77 DON'T KNOW/NOT SURE
- 99 REFUSED

Q20.8 **[IF Q20.7=4, OTHERWISE SKIP TO Q20.9]** What type of clinic did you go to for your last HIV test?
(n=283)

- 1 Family planning clinic (29.5%)
- 2 STD clinic (3.8%)
- 3 Prenatal clinic (6.0%)
- 4 Public health clinic (26.6%)
- 5 Community health clinic (17.7%)
- 6 Hospital clinic (9.6%)
- 8 Other (0.0%)
- 7 DON'T KNOW/NOT SURE (6.8%)
- 9 REFUSED

Q20.9 **[IF Q20.7=7, OTHERWISE SKIP TO Q20.10]** Was this test done by a nurse or other health worker, or with a home testing kit?
(n=56)

- 1 Nurse or health worker (96.2%)
- 2 A test kit (3.9%)
- 7 DON'T KNOW/NOT SURE
- 9 REFUSED

Q20.10 I'm going to read you a list. When I'm done, please tell me if any of the situations apply to you. You don't need to tell me which one.

- You have used intravenous drugs in the past year,
- You have been treated for a sexually transmitted or venereal disease in the past year,
- You have given or received money or drugs in exchange for sex in the past year,
- You had anal sex without a condom in the past year,

Do any of these situations apply to you?
(n=3,980)

- 1 Yes (3.2%)
- 2 No (96.9%)
- 7 DON'T KNOW/NOT SURE
- 9 REFUSED

Q20.11 The next question is about sexually transmitted diseases other than HIV, such as syphilis, gonorrhea, chlamydia, or genital herpes. In the past 12 months has a doctor, nurse or other health professional talked to you about preventing sexually transmitted diseases through condom use?
(n=3,980)

- 1 Yes (8.6%)
- 2 No (91.4%)
- 7 DON'T KNOW/NOT SURE
- 9 REFUSED

SECTION 21: FIREARMS

Q21.1 The next questions are about firearms. We are asking these in a health survey because of our interest in firearm-related injuries. Please include weapons such as pistols, shotguns, and rifles; but not BB guns, starter pistols, or guns that cannot fire. Include those kept in a garage, outdoor storage area, or motor vehicle. Are any firearms kept in or around your home?
(n=4,841)

- 1 Yes (55.7%)
- 2 No (44.3%)
- 7 DON'T KNOW/NOT SURE
- 9 REFUSED

Q21.2 **[IF Q21.1=1, OTHERWISE SKIP TO NEXT SECTION]** Are any of these firearms now loaded?
(n=2,648)

- 1 Yes (19.7%)
- 2 No (80.4%)
- 7 DON'T KNOW/NOT SURE
- 9 REFUSED

Q21.3 Are any of these loaded firearms also unlocked? By unlocked, we mean you do not need a key or combination to get the gun or to fire it. We don't count a safety as a lock.
(n=519)

- 1 Yes (63.8%)
- 2 No (36.2%)
- 7 DON'T KNOW/NOT SURE
- 9 REFUSED

MODULE 9: ADULT ASTHMA HISTORY

M9.1 **[IF Q9.1=1, OTHERWISE SKIP TO NEXT SECTION]**
Previously you said you were told by a doctor, nurse or other health professional that you had asthma. How old were you when you were first told by a doctor or other health professional that you had asthma?
(n=661)

Mean age in years (older than 10 years): 32.5

- 97 AGE 10 OR YOUNGER (32.6%)
- 98 DON'T KNOW/NOT SURE
- 99 REFUSED

M9.2 **[IF Q9.2=1, OTHERWISE SKIP TO NEXT SECTION]**
During the past 12 months, have you had an episode of asthma or an asthma attack?
(n=434)

- 1 Yes (52.2%)
- 2 No (47.8%)
- 7 DON'T KNOW/NOT SURE
- 9 REFUSED

M9.3 During the past 12 months, how many times did you visit an emergency room or urgent care center because of your asthma?
(n=437)

Mean number of visits in past 12 months: 0.2

- 98 DON'T KNOW/NOT SURE
- 99 REFUSED

M9.4 During the past 12 months, how many times did you see a doctor, nurse or other health professional for urgent treatment of worsening asthma symptoms?
(n=430)

Mean number of times in past 12 months: 0.4

- 98 DON'T KNOW/NOT SURE
- 99 REFUSED

M9.5 During the past 12 months, how many times did you see a doctor, nurse or other health professional for a routine checkup for your asthma?
(n=428)

Mean number of times in past 12 months: 1.0

- 98 DON'T KNOW/NOT SURE
- 99 REFUSED

M9.6 During the past 12 months, how many days were you unable to work or carry out your usual activities because of your asthma?
(n=419)

- 777 DON'T KNOW/NOT SURE
- 999 REFUSED

M9.7 Symptoms of asthma include cough, wheezing, shortness of breath, chest tightness and phlegm production when you don't have a cold or respiratory infection. During the past 30 days, how often did you have any symptoms of asthma? Would you say not at any time, less than once a week, once or twice a week, more than 2 times a week, but not every day, every day, but not all the time, or every day, all the time?

(n=426)

- 1 Less than once a week (29.0%)
- 2 Once or twice a week (22.0%)
- 3 More than 2 times a week, but not every day (8.8%)
- 4 Every day, but not all the time (10.1%)
- 5 Every day, all the time (6.9%)
- 8 Not at any time (23.2%)

- 7 DON'T KNOW/NOT SURE
- 9 REFUSED

M9.8 **[IF M9.7#8, OTHERWISE SKIP TO M9.9]** During the past 30 days, how many days did symptoms of asthma make it difficult for you to stay asleep? Would you say none, one or two, three to four, five, six to ten, or more than ten?

(n=333)

- 1 One or two (23.4%)
- 2 Three to four (5.5%)
- 3 Five (4.7%)
- 4 Six to ten (4.2%)
- 5 More than ten (5.8%)
- 8 None (56.4%)

- 7 DON'T KNOW/NOT SURE
- 9 REFUSED

M9.9 During the past 30 days, how often did you take asthma medication that was prescribed or given to you by a doctor? This includes using an inhaler. Would you say you didn't take any, less than once a week, once or twice a week, more than 2 times a week, but not every day, once every day, or two or more times every day?

(n=435)

- 1 Less than once a week (12.5%)
- 2 Once or twice a week (11.9%)
- 3 More than 2 times a week, but not every day (6.5%)
- 4 Once every day (16.4%)
- 5 2 or more times every day (17.1%)
- 8 Did not take any (35.6%)

- 7 DON'T KNOW/NOT SURE
- 9 REFUSED

MODULE 10: CHILDHOOD ASTHMA

M10.1 **[IF Q13.6<88, OTHERWISE SKIP TO NEXT SECTION]** Earlier you said there were **[fill in number from Q13.6]** children age 17 or younger living in your household. How many of these children have ever been diagnosed with asthma?

(n=1,936)

Mean number of children: 0.2

- 77 DON'T KNOW/NOT SURE
- 88 NONE
- 99 REFUSED

M10.2 **[IF M10.1<77, OTHERWISE SKIP TO NEXT SECTION]** **[if M10.1=1 show "Does this child", if M10.1>1 show "How many of these children"]** still have asthma? (If only one child from M10.1 and response is "Yes" to this question, code "1". If response is "No", code as "88.")

(n=312)

Mean number of children: 0.8

- 77 DON'T KNOW/NOT SURE
- 88 NONE
- 99 REFUSED

MODULE 19: BINGE DRINKING

M19.1 **[IF Q8.3<77, OTHERWISE SKIP TO NEXT SECTION]** The next questions are about the most recent occasion when you had 5 or more alcoholic beverages. One alcoholic beverage is equal to a 12-ounce beer, a 4-ounce glass of wine, or a drink with 1 shot of liquor. During the most recent occasion when you had 5 or more alcoholic beverages, about how many beers, including malt liquor, did you drink?

(n=532)

Mean number of drinks: 5.5

- 77 DON'T KNOW/NOT SURE
- 99 REFUSED

M19.2 During the same occasion, about how many glasses of wine, including wine coolers, hard lemonade, or hard cider, did you drink?

(n=545)

Mean number of drinks: 0.6

- 77 DON'T KNOW/NOT SURE
- 99 REFUSED

M19.3 During the same occasion, about how many drinks of liquor, including cocktails, did you have?

(n=536)

Mean number of drinks: 1.5

- 77 DON'T KNOW/NOT SURE
- 99 REFUSED

M19.4 During this most recent occasion, where were you when you did most of your drinking?

(n=547)

- 1 At your home, for example, your house, apartment, condominium, or dorm room (45.8%)
- 2 At another person's home (14.8%)
- 3 At a restaurant or banquet hall (4.5%)
- 4 At a bar or club (23.7%)
- 5 At a public place, such as at a park, concert, or sporting event (4.7%)
- 6 Other (6.5%)

- 7 DON'T KNOW/NOT SURE
- 9 REFUSED

M19.5 During this most recent occasion, how did you get most of the alcohol?

(n=548)

- 1 Someone else bought it for me or gave it to me (12.2%)
- 2 I bought it at a store, such as a liquor store, convenience store, or grocery store (57.6%)
- 3 I bought it at a restaurant, bar or public place (23.8%)
- 4 Other (6.4%)

- 7 DON'T KNOW/NOT SURE
- 9 REFUSED

M19.6 Did you drive a motor vehicle, such as a car, truck, or motorcycle during or within a couple of hours after this occasion?

(n=548)

- 1 Yes (8.8%)
- 2 No (91.2%)

- 7 DON'T KNOW/NOT SURE
- 9 REFUSED

STATE ADDED: HEALTH CARE ACCESS AND INSURANCE

ID01Q01 **[IF Q3.1=2, OTHERWISE SKIP TO ID01Q03]** Previously you said that you did not have any kind of health care coverage. What is the main reason you are without health care coverage?
(n=704)

- 1 Lost job or changed employers (10.9%)
- 2 Spouse or parent lost job or changed employers [includes any] (1.1%)
- 3 Became divorced or separated (0.3%)
- 4 Spouse or parent died (0.0%)
- 5 Became ineligible because of age or because left school (1.6%)
- 6 Employer doesn't offer or stopped offering coverage (11.3%)
- 7 Cut back to part time or became temporary employee (0.9%)
- 8 Benefits from employer or former employer ran out (0.7%)
- 9 Couldn't afford to pay the premiums (56.3%)
- 10 Insurance company refused coverage (0.4%)
- 11 Lost Medicaid or Medical Assistance eligibility (2.2%)
- 87 Other (14.2%)
- 77 DON'T KNOW /NOT SURE
- 99 REFUSED

ID01Q02 About how long has it been since you had health care coverage?
(n=700)

- 1 Within the past 6 months (anytime less than 6 months ago) (16.7%)
- 2 Within the past year (6 months but less than 12 months ago) (10.0%)
- 3 Within the past 2 years (1 year but less than 2 years ago) (17.7%)
- 4 Within the past 5 years (2 years but less than 5 years ago) (20.4%)
- 5 5 or more years ago (27.5%)
- 8 NEVER (7.7%)
- 7 DON'T KNOW /NOT SURE
- 9 REFUSED

ID01Q03 **[IF Q3.1=1, OTHERWISE SKIP TO ID01Q04]** Previously, you said that you had some kind of health care coverage. What type of health care coverage do you use to pay for most of your medical care? Is it coverage through . . .
(n=4,289)

- 1 Your employer (42.9%)
- 2 Someone else's employer (18.9%)
- 3 A plan that you or someone else buys on your own (11.3%)
- 4 Medicare (15.4%)
- 5 Medicaid or Medical Assistance (3.3%)
- 6 The military, CHAMPUS, TriCare, or the VA (4.4%)
- 7 The Indian Health Service (0.3%)
- 8 Some other source (3.2%)
- 88 NONE (0.2%)
- 77 DON'T KNOW /NOT SURE
- 99 REFUSED

ID01Q04 How would you rate your satisfaction with your overall health care? Would you say:
(n=5,021)

- 1 Excellent (19.1%)
- 2 Very Good (29.9%)
- 3 Good (33.5%)
- 4 Fair (11.3%)
- 5 Poor (4.0%)
- 8 NOT APPLICABLE / DON'T USE ANY HEALTH SERVICES (2.3%)
- 7 DON'T KNOW /NOT SURE
- 9 REFUSED

ID01Q05 Earlier I asked you about visits to the dentist. Do you have any kind of insurance coverage that pays for some or all of your routine dental care, including dental insurance, prepaid plans such as HMOs, or government plans such as Medicaid?
(n=5,013)

- 1 Yes (56.6%)
- 2 No (43.5%)
- 7 DON'T KNOW/NOT SURE
- 9 REFUSED

STATE ADDED: HEALTH DISTRICT SPONSORED QUESTIONS

ID02Q01 Is the water in your household provided by a well, a city or municipal water supply, or some other source?
(n=4,993)

- 1 Well (private or shared) (30.3%)
- 2 City or municipal water supply (68.4%)
- 3 Other (SPECIFY) (1.3%)
- 7 DON'T KNOW /NOT SURE
- 9 REFUSED

ID02Q02 **[IF ID02Q01=1, OTHERWISE SKIP TO ID02Q03]** Has your well water been tested in the past 12 months?
(n=1,494)

- 1 Yes (40.4%)
- 2 No (59.6%)
- 7 DON'T KNOW/NOT SURE
- 9 REFUSED

ID02Q03 Was there a time during the past 12 months when you believe you have become ill because of what you ate at a restaurant?
(n=5,031)

- 1 Yes (17.7%)
- 2 No (82.3%)
- 7 DON'T KNOW/NOT SURE
- 9 REFUSED

ID02Q04 After handling raw meat or chicken in the kitchen, which of the following best describes what you usually do next?
(n=5,046)

- 1 Continue cooking (1.4%)
- 2 Rinse and/or wipe your hands, then continue cooking (9.6%)
- 3 Wash your hands with soap and water, then continue cooking (80.6%)
- 4 You don't handle meat or chicken (8.0%)
- 5 OTHER (0.4%)
- 7 DON'T KNOW/NOT SURE
- 9 REFUSED

STATE ADDED: INJURY

ID03Q01 **[IF Q13.6#88, OTHERWISE SKIP TO ID03Q03]** What is the age of the oldest child in your household under the age of 16?
(n=1,937)

Mean age in years (Under 16): 9.0

- 77 DON'T KNOW /NOT SURE
- 88 NO CHILDREN UNDER AGE 16
- 99 REFUSED

ID03Q02 **[IF ID03Q01<77, OTHERWISE SKIP TO ID03Q03]** How often does the [fill in age from ID03.1]-year-old child in your household use a car safety seat when they ride in a car? Would you say. . .

(n=1,728)

- 1 Always (86.5%)
- 2 Nearly Always (9.2%)
- 3 Sometimes (3.3%)
- 4 Seldom (0.2%)
- 5 Never (0.8%)
- 7 DON'T KNOW /NOT SURE
- 8 NEVER RIDES IN A CAR (0.0%)
- 9 REFUSED

ID03Q03 In the past 12 months, have you had a fall?
(n=5,053)

- 1 Yes (22.0%)
- 2 No (78.0%)
- 7 DON'T KNOW/NOT SURE
- 9 REFUSED

ID03Q04 **[IF ID03Q03=1, OTHERWISE SKIP TO ID04Q01]** Were you injured? By injured, we mean the fall caused you to limit your regular activities for at least a day or to go see a doctor.
(n=1,131)

- 1 Yes (44.6%)
- 2 No (55.4%)
- 7 DON'T KNOW/NOT SURE
- 9 REFUSED

STATE ADDED: SUBSTANCE ABUSE

ID04Q01 I am now going to ask about your non-medical use of drugs. "Non-medical use" means using drugs not prescribed by a doctor, or used to get high or for curiosity. I will be referring to cocaine (including crack) heroin or drugs like heroin (such as codeine or Demerol), marijuana (also referred to as pot or hashish), methamphetamine (also known as meth, crank or ice), hallucinogens, inhalants, prescription painkillers, stimulants and sedatives. Remember, all information on this survey is strictly confidential. Have you ever used any of the drugs I just mentioned?
(n=5,047)

- 1 Yes (21.8%)
- 2 No (78.3%)
- 7 DON'T KNOW/NOT SURE
- 9 REFUSED

ID04Q02 **[IF ID04Q01=1, OTHERWISE SKIP TO ID05Q01]** How long has it been since you last used any of these drugs? Would you say...

(n=978)

- 1 Within the last 30 days (15.1%)
- 2 More than 30 days but within the past 12 months (11.4%)
- 3 More than 12 months ago (73.6%)
- 7 DON'T KNOW/NOT SURE
- 9 REFUSED

ID04Q03 **[IF ID04Q01=1 AND ID04Q02<7, OTHERWISE SKIP TO NEXT SECTION]** What drug did you use most recently?
(n=895)

- 1 MARIJUANA (76.9%)
- 2 METHAMPHETAMINE (7.4%)
- 3 COCAINE (4.6%)
- 4 HEROIN (<0.1%)
- 5 OTHER (SPECIFY) (11.0%)
- 7 DON'T KNOW/NOT SURE
- 9 REFUSED

STATE ADDED: MENTAL HEALTH

ID05Q01 The next few questions ask about your mental and emotional health. During the past year, have you thought you might have depression?

(n=5,042)

- 1 Yes (28.5%)
- 2 No (71.5%)
- 7 DON'T KNOW/NOT SURE
- 9 REFUSED

ID05Q02 During the past year, have you been diagnosed with depression?

(n=5,057)

- 1 Yes (10.3%)
- 2 No (89.7%)
- 7 DON'T KNOW/NOT SURE
- 9 REFUSED

ID05Q03 Have you needed treatment for any mental or emotional problems during the last five years, but have been unable to get it?
(n=5,054)

- 1 Yes (3.3%)
- 2 No (96.7%)
- 7 DON'T KNOW/NOT SURE
- 9 REFUSED

ID05Q04 **[IF ID05Q03=1, OTHERWISE SKIP TO ID05Q05]** Why were you unable to get treatment for your mental and emotional problem?

(n=145)

- 1 Cost/Couldn't afford (69.8%)
- 2 Insurance would not cover (6.9%)
- 3 Lack of transportation (1.8%)
- 4 No place was close enough/ available/ convenient (2.0%)
- 5 Do not know where to go (3.8%)
- 6 Do not trust psychiatrist/ psychologist/ doctors (2.5%)
- 7 Embarrassed/ Stigmatism (2.4%)
- 8 Other [SPECIFY] (10.9%)
- 77 DON'T KNOW/NOT SURE
- 99 REFUSED

ID05Q05 Have you ever attempted suicide?
(n=5,061)

- 1 Yes (4.7%)
- 2 No (95.3%)
- 7 DON'T KNOW/NOT SURE
- 9 REFUSED

ID05Q06 **[IF ID05Q05=1, OTHERWISE SKIP TO NEXT SECTION]** When did you make the last attempt?
(n=221)

- 1 Within the past year (7.1%)
- 2 Within the past 5 years (22.1%)
- 3 Within the past 10 years (26.8%)
- 4 More than 10 years ago (44.0%)
- 7 DON'T KNOW/NOT SURE
- 9 REFUSED

STATE ADDED: SMOKELESS TOBACCO

ID06Q01 Have you ever used or tried any smokeless tobacco products such as chewing tobacco or snuff?
(n=5,065)

- 1 Yes (23.6%)
- 2 No (76.4%)
- 7 DON'T KNOW/NOT SURE
- 9 REFUSED

ID06Q02 **[IF ID06Q01=1]** Do you currently use chewing tobacco or snuff everyday, some days, or not at all?
(n=1,039)

- 1 Every day (13.4%)
- 2 Some days (7.9%)
- 3 Not at all (78.7%)
- 7 DON'T KNOW/NOT SURE
- 9 REFUSED
